

DATASHEET

Magnetic Mount - Ø32 (30kg) - incl. Bolt

SKU: ACCS622010-MAGN-3230

Category: Accessories

Description

Magnetic Mount - Ø32 (30kg) - incl. Bolt

The 32 mm diameter flat magnet in a steel pot has a countersunk borehole and can be mounted with a countersunk bolt (bolt and nut are included). This magnetic mount can carry up to 30 kilos.

Used for: temporary mounting of iQunet sensors on a flat surface (see attachment for the safety and assembly instructions).

Technical specification

- **Physical:**
 - **Diameter (mm):** 32
 - **Height (mm):** 7
 - **Tolerance (mm):** +-0.1
 - **Weight:** 35g
 - **Material:** NdFeB
 - **Coating:** Nickel-plated
 - **Steel:** Q235 (China)
- **Installation:** attached with bolt and nut to sensor (bolt and nut are included)
- **Operating temperature:** +80°C max
- **Magnetisation:** N38
- **Strength:** +-30kg

Assembly instruction

Attach the magnet to the flat side of the sensor using the supplied bolt, pinion and screw-nut.

Attention: read the safety instructions carefully.
